CURRENT WORK

Catloaf Software, Inc. Founder & Software Engineer · Los Angeles, CA · 2010-Present

- Build and maintain products across iOS, Android, and the web.
- Lead product and engineering work spanning native apps, web applications, backend systems, AI integrations, subscriptions, and release operations.
- Current products include [Text With](#), [Teachee](#), [Fretuoso](#), and [Texts From](#).

Codehost, Inc. Senior Software Engineer · Los Angeles, CA · 2001-Present

- Lead engineer on BrightQ printing software for Linux and Unix systems.
- Develop cross-platform C/C++ software across Solaris, Linux, HP-UX, SCO, IRIX, AIX, and FreeBSD.
- Designed printing, networking, installation, licensing, and server-side systems using GTK, Apache, PHP, Perl, MySQL, and HTTP/SSL.

SELECTED PORTFOLIO

[Text With apps](#) AI educational products · iOS, Android, Mac, and PWA

Build and operate AI-assisted educational and devotional apps across native and web platforms, including subscriptions, media, sharing, localization, and distribution.

[Fretuoso®](#) Music education · Apple platforms

Develop the fretboard-training app for guitar, bass, ukulele, banjo, and mandolin, from product delivery through long-term maintenance.

[Spock's Beard](#) Official web presence · Jekyll and Cloudflare

Design and maintain the website and online infrastructure for the progressive rock band.

SELECTED EARLIER EXPERIENCE

Diamond Foundry, Inc. DevOps Contractor · 2018-2026

Provide cloud system administration for AWS, Rackspace, and more; develop middleware and business-supporting software components. Technologies used: React, PHP, Node.js, AWS Lambda, ECS, Docker.

Build and maintain cross-platform printing, networking, installation, licensing, and server-side software for Unix and Linux environments. Supported major printer manufacturers such as Canon, Ricoh, and more.

Led programming work on Linux ports of major game titles:

- [SimCity 3000 Unlimited](#)
- [Myth II: Soulblighter](#)
- [Heroes of Might & Magic III](#)
- [Kohan: Immortal Sovereigns](#)
- [Railroad Tycoon II](#)

Maintained the open-source [Loki Setup installer](#) used for Loki products and contributed to [SDL](#), [SMPEG](#), and [SDL_mixer](#).

SELECTED PUBLICATION

[Overview of Linux Printing Systems](#)

Linux Journal · 2003

Ported the SciTech MGL graphics library to Unix/X11, developed the first Linux version of the SciTech Display Doctor suite, and started [makeself](#), the self-extracting archiving tool for Unix systems.

TECHNICAL FOCUS

Mobile

iOS, iPadOS, macOS, Android, PWA, Swift, SwiftUI, Objective-C, Kotlin

AI systems

OpenAI, Google Gemini, agentic workflows, tool calling, RAG, evaluation, prompt engineering

Web & cloud

React, TypeScript, JavaScript, Node.js, Jekyll, Cloudflare, AWS, REST APIs, Docker

Backend & systems

Python, PostgreSQL, MySQL, Unix, Linux, C, C++, shell scripting

Delivery

Product strategy, subscriptions, localization, analytics, CI/CD, release engineering, App Store operations

EDUCATION

Master’s, Computer Science

[Polytech Nice Sophia \(formerly ESSI\)](#)
Université de Nice-Sophia Antipolis, France
1996-1999

Associate Degree, Computer Science

[Université Claude Bernard Lyon 1, France](#)
1994-1996

LANGUAGES

English · French · Spanish
